

GENERAL PRODUCT AND WORKMANSHIP WARRANTY

Imocave Pty Ltd T/A RTT Sealant have in place a 20 million dollar public liability insurance policy and are backed by a QBCC Waterproofing Licence and the Master Builders Association. These organisations provide a two year warranty against defects in products and workmanship.

RTT Sealant will provide an additional eight year warranty on unexposed applications (out of direct sunlight e.g. tanks, cellars, underground car parks etc) and an additional eight year warranty on exposed applications ONLY where our solar reflective top coat has been applied. This complete warranty is valid for ten years from the date of commission, subject to the following terms and conditions:

- Warranty does not cover any unauthorised person accessing the area and potentially damaging the membrane;
- RTT Sealant must be notified prior to any future works being performed on the area, inside or out;
- RTT Sealant must be notified of any damage to the membrane caused by other parties (E.g. Pressure washing, hot works, parts installation and maintenance etc).
- Warranty does not cover accidental or malicious damage, structural damages or acts of nature (earthquakes, landslides, floods, storms etc).
- Warranty will be void should the membrane cease to be 'seamless' from any of the above.

Any claims on this warranty must be made within the warranty period.

Extended warranty of up to 15 years can be arranged by prior consultation with RTT Sealant and involves excessive preparation and applying further solar reflective top coat onto the membrane. Depending on the substrate condition and project location, quotes will incur a 15% – 20% increase and require an inspection and possible refresh of the top coat on or before every 5 years.

Please contact RTT Sealant if you have any comments or questions.
